

Environmental aspects

CORPORATE MANAGEMENT

Our activities and industrial processes could have impacts on the environment and on the safety and health of our operators so we must guide ourselves to improve our capacity to reduce these impacts locally and globally and obtain a profitability for all our stakeholders.

Therefore we identify, evaluate and manage the environmental and safety **RISKS** derived from our activities trying to minimize them and commit ourselves to guarantee the maximum safety and quality of our services and products and the health of our workers.

We are aware that the fulfillment of our responsibilities when these impacts appear makes our activities to be carried out on the basis of sustainability criteria.

The fulfillment of this vision as well as the responsibilities in these terms are the guide and the basis of our behavior in the field of our Corporate Social Responsibility (CSR).

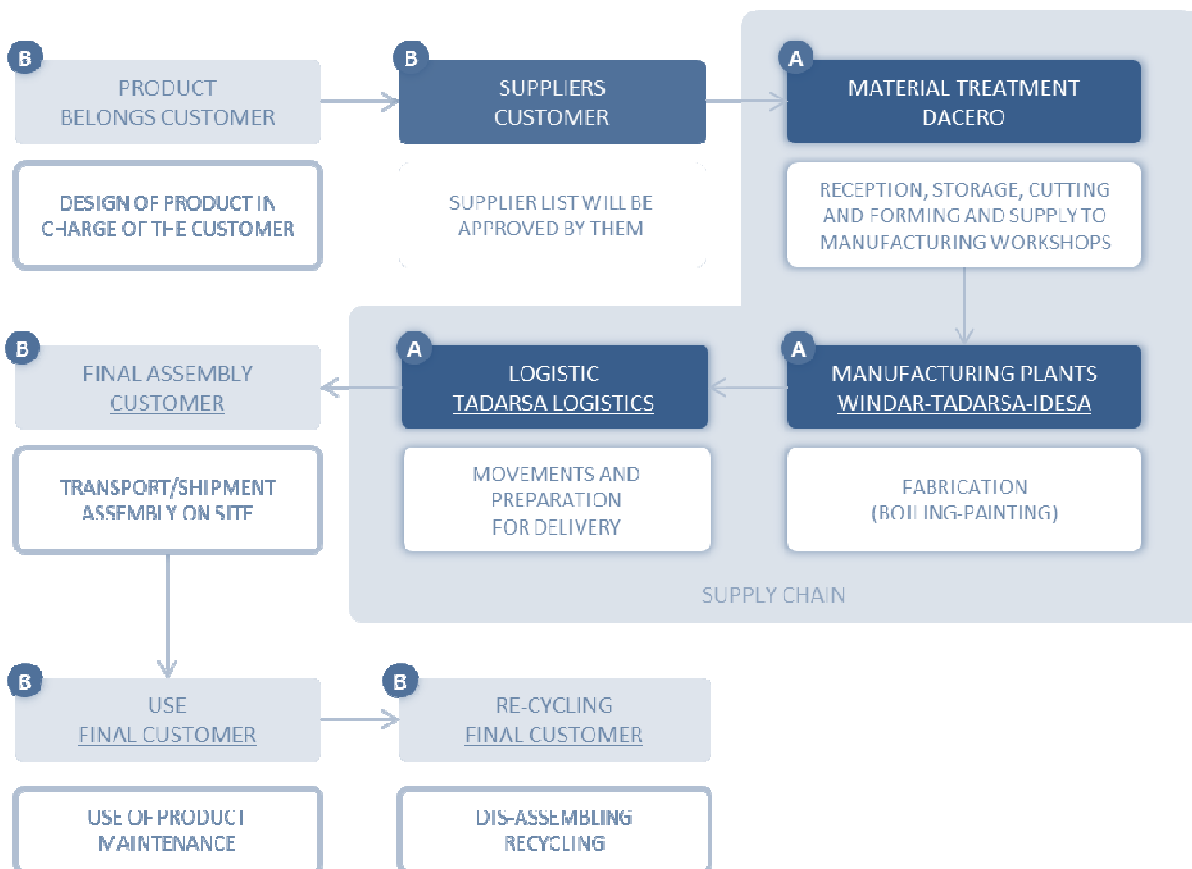

The preservation and protection of the environment as well as the health and safety of our employees is an integrated management of the organization and decision-making by the Steering Board motivated by its contribution to the competitiveness of industry and the society in general.

ENV. ASPECTS 1

Environmental aspects

CORPORATE MANAGEMENT

A INTERNAL RISK
B EXTERNAL RISK

In normal operating conditions, the products supplied to our customers do not present risks to the environment in which they are found.

ENV. ASPECTS 2

A high percentage (approx. 80%) of the product is considered recyclable (carbon steel, aluminum and stainless steel structure) and a small percentage (around 20% approx.) is not recyclable (paint materials). Also the electrical components, can also be recycled.
